Benefits of Water Aerobics Classes:

- Great Exercise for Everyone
- Less Impact on Joints
- Improves Range of Motion
- No Swimming Required
- Builds Strength
- Helps with Weight Management
- Build Community and Have Lots of Fun!

CLASS DESCRIPTIONS ON BACK

Class Descriptions

Aqua Fun Fit

This is a cardio based workout to music, taught in the shallow end of the pool. Each participant is encouraged to have fun while moderating their workout to suit their own personal fitness level of high or low impact and intensity.

Arthritis Aerobics

This is a low impact class, taught in the shallow end of the pool, focused on improving mobility, flexibility, while maintaining muscle mass and increasing strength. Each participant is encouraged to exercise at their own pace and level of fitness.

Deep Water HIIT or High Intensity Interval Training

This class features a variety of short bursts of high intensity exercises followed by a shorter period of recovery taught in the deep end of the pool. HIIT is specifically structured to burn calories and boost metabolism. Although the workout is challenging, it can also be modified for people of all fitness levels. Participants are required to wear flotation belts provided by the Y or feel free to bring your own.

Low Impact Aerobics

This is a low intensity class taught in the shallow end of the pool focused on keeping your body moving while improving your overall cardiovascular health and fitness. Instructors may utilize dumbbells, noodles, bands, and/or the pool wall to assist in strengthening and stretching. Each participant is encouraged to exercise at their own pace and level of fitness.

Total Body Stretch – NEW!

This is a no impact-no intensity class taught in the shallow end of the pool designed for people of all workout levels and ages to increase mobility and flexibility.

Total Body Workout

This is a fun filled, high energy workout to music that focuses on the entire body. Each class begins with a ten minute stretch and transitions into forty minutes of aerobics, ending with strengthening the upper/lower body. Each workout is designed to reach a goal of at least 5,000 steps. Participants are encouraged to modify their workout to suit their own personal fitness level.
